this is the first part of a two volume history of the habsburg empire from its medieval origins to its dismemberment in the first world war the second part on the habsburg empire from 1700 to 1918 is now in preparation the present volume which is self contained meets a long felt need for a systematic survey in english of the habsburgs and their lands in the late medieval and early modern period while it is primarily concerned with the lands and peoples of central and northern europe who had been brought under the personal rule of the habsburg dynasty by the end of the middle ages most notably the austrians germans czechs and hungarians the history of the spanish habsburgs in spain and the netherlands is also covered in sufficient detail to show the reader how the fortunes of the austrian and spanish branches of the family were interlinked the family history of the habsburgs themselves is skillfully interwoven with the processes of state formation much biographical detail of the dominant personalities of the dynasty emerges from the narrative and though the treatment is primarily political there are extended discussions of economic developments social change and major cultural movements because the habsburg empire was and remained dynastic and diverse rather than national and centralised it covered a huge range of different peoples cultures constitutions and separate histories few historians have had the breadth of knowledge or the courage to attempt a single systematic survey of its development and its fortunes yet the habsburgs were the great superpower of central europe for five centuries until our own and in the period covered by the present volume much more even than that as rulers also of spain and the netherlands and with the headship of the holy roman empire itself as a de facto family possession the size of the task is thus itself an indication of the size of the gap that professor berenger s first volume now fills clear balanced authoritative and accessible it is a remarkable feat of synthesis and exposition

the austrian domination of venice and venetia after the congress of vienna has traditionally received a bad press the restoration regime was long villified as oppressive and exploitative and in direct opposition to the interests of almost all classes of the population this volume questions this view arguing from detailed archival research that francis i s rule brought many real benefits to his venetian subjects the root of the remarkable passivity of venetia in the years after the fall of napoleon should not be explained in terms of pervasive policing heavy

handed censorship and the presence of metternich's forest of bayonets but rather by the existence of a fair and responsive if sometimes cumbersome administrative structure having outlined the origins of austrian control of venetia in terms of radical political and territorial changes experienced during the revolutionary and napoleonic period this work examines the mechanisms of austrian rule early chapters focus on the uncomfortable tensions that existed between the temptation to retain a modernised machinery of state inherited from napoleon's kingdom of italy and the desire to look to models existing in the rest of the habsburg monarchy with the aim of creating greater uniformity with the rest of the multinational empire various aspects of the habsburg system are examined to assess the burden of austrian control in the form of taxation and conscription and the way in which education policing the church and censorship were used in sometimes surprising ways to attach the venetian population to their habsburg masters finally the book addresses the question of what went wrong between the death of francis i in 1835 and the venetian insurrection of 1848-9 to alienate the population so radically

while spanish traders of the sixteenth and seventeenth centuries were mining the riches of the new world the portuguese continued to reap the lucrative asian trade in spices and luxury items historians have long considered the portuguese trade the exclusive enterprise of the kings of portugal and a few privileged aristocrats with only minimal participation by private merchants but in fact argues james c boyajian actual capital investments by private portuguese merchants were roughly ten times those of the portuguese crown and even exceeded those of the far larger dutch east india company in portuguese trade in asia under the habsburgs boyajian reassesses the consequences of portugal's flourishing private trade with asia including increased tensions between the growing urban merchant class and the still dominant landed aristocracy he also shows how portuguese asian trade formed part of a global trading network that linked not only europe and asia but also for the first time asia west africa brazil and spanish america and he argues that contrary to previous scholarly opinion nearly half of the portuguese asian trade was controlled by new christians descendants of iberian jews forcibly converted to christianity in the 1490s ironically boyajian concludes the vast wealth that flowed into portugal between 1580 and 1640 did little to enrich the country landed aristocrats who controlled the church the inquisition and the royal administration used their position to deny merchants the social standing that would encourage productive investments in portugal and by the seventeenth century the portuguese asian trade itself was doomed the result boyajian argues not of the much heralded dutch economic successes but of dutch naval blockades that effectively severed portugal's trading lifeline with asia
